Agenda

- The three freedoms of Open Source
 - ◆ Free like beer
 - ◆ Free like speech
 - ◆ Free like puppy
- People of Open Source
- How YOU can get involved

Free like beer

Everybody's favourite price:

\$0

'LinTel' disrupted the proprietary Unix Server market

[Silicon Graphics Onyx 2 and Origin 2000](#) by Svensson, Gert [CC BY 3.0](#)

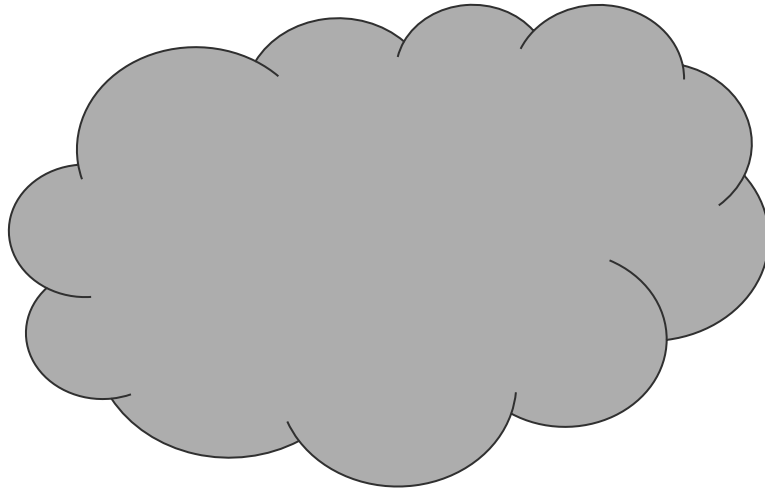

You don't need a purchase order for:

\$0

Open Source (esp Linux) has enabled the cloud

You don't need permission from your boss to spend:

\$0

Do Try This At Home

Free like speech

[Speeches, London Copyfighters' Drunken Brunch and Talking Shop speeches at Speakers' Corner, Hyde Park, London](#)

Free like puppy

Software needs care and feeding too

[Dog Food](#)

by Sh4rp_i [CC BY 2.0](#)

Software also has mess that needs cleaning up

So ask yourself: “How much puppy?”

People of Open Source

Richard Stallman

Everybody, Anybody, You

<https://github.com/certbot/certbot>

How YOU can get involved

If you find something, fix something

Be considerate of upstream maintainers

Read CONTRIBUTING.md

Understand and follow any Code of Conduct

Be considerate of upstream maintainers (@company 'rules of engagement')

1. Raise an issue on the upstream repo
2. Submit a pull request with the desired change
3. Fork the repo and publish a variant

There are some great learning resources

4600 XP

Build community-driven software projects on GitHub

6 hr 1 min • Learning Path • 7 Modules

Beginner

DevOps Engineer

Developer

Solution Architect

GitHub

Whether you manage enterprise or open-source software projects, learn how GitHub enables you to build communities that foster communication and collaboration while reinforcing recommended guidelines, codes of conduct, and security best practices.

In this learning path, you'll learn how to:

- Build community involvement for both proprietary and open-source projects.
- Choose whether your idea is a good candidate for an open-source project.
- Move an existing project to GitHub from your personal computer or from a legacy version control system.
- Keep your GitHub repository secure.
- Contribute to an open-source project.

Prerequisites

- A [GitHub](#) account

@ Company Mobile App Challenge

The Challenge: Reinvent the @rrive mobile app!

One of our @platform apps in development is nearly complete but needs your help! @rrive is a fully open source Flutter app designed to securely share locations with people you trust. Share locations one-on-one for a specific time period or create an event for several people in your circle and share your locations for that event.

Use your imagination and creativity to incorporate any of the following, or develop your own ideas!

- New Use Cases
- New Features & Tools
- Better User Interface & Experience
- UI Simplification
- Better Use of Flutter/Dart Code and Widgets
- Better Use of the Free and Open-Source @platform
- Gamification
- Other Enhancements
