

Mythos & Glasswing

The beginning of the end for zero days?

Paradox - June 2026

Mythos is very good at finding bugs (and exploitation paths)

NEWS FEATURE | 26 May 2026

Too dangerous to release: is Mythos the start of the restricted-AI era?

What happens when AI companies produce models that they say the public can't have – and how should users and governments react?

CURL AND LIBCURL, SECURITY

MYTHOS FINDS A CURL VULNERABILITY

🕒 MAY 11, 2026 👤 DANIEL STENBERG 💬 33 COMMENTS

yes, as in singular one.

<https://daniel.haxx.se/blog/2026/05/11/mythos-finds-a-curl-vulnerability/>

Where do zero days
come from?

BUGS

(Any software flaw or mistake)

Logic Errors

Crashes

Input
Validation
Issues

ZERO DAYS

(Vulnerabilities with NO patch)

Unknown
to Vendor

No Fix
Available

Actively
Exploited

Insecure
Defaults

User Interface
Glitches

15th USENIX SECURITY SYMPOSIUM

VANCOUVER, B.C., CANADA July 31–Aug. 4, 2006

Milk or Wine: Does Software Security Improve with Age?

Figure 4: The lifetime of foundational vulnerabilities reported during the study period.

Vulnerability age

<https://daniel.haxx.se/blog/2025/07/10/more-views-on-curl-vulnerabilities/>

How is the discovery
process going?

Counts as of May 22, 2026

<https://www.anthropic.com/research/glasswing-initial-update>

Vulnerability discovery harness
