#define Operations

Provisioning

Config Management

Monitoring

Logging

Or as Charity Majors @mipsytipsey put it

“Operations is the constellation of your org's technical skills, practices, and cultural values around designing, building and maintaining systems, shipping software, and solving problems with technology.”

#define DevOps

The operational practices that have co-evolved with IaaS

or

Flow

Feedback

Continuous Learning by Experimentation

#define NoOps

~~Provisioning~~

~~Config Management~~

~~Monitoring~~

~~Logging~~

#define LessOs

Provisioning aaS

Config Management < will be 'code', won't go away

Monitoring aaS

Logging aaS

We're not there yet
